Section 4 : First aid measures

4.1. Description of first aid measures

- *If inhaled :*
If breathed in, move person into fresh air. If not breathing, give artificial respiration.
- *In case of skin contact :*
Wash off with soap and plenty of water
- *In case of eye contact :*
Flush eyes with water as a precaution
- *If swallowed:*
Never give anything by mouth to an unconscious person. Rise mouth with water.

4.2. Most important symptoms and effects, both acute and delayed

There is no description of any toxic symptoms for the dipstick.

The amorphous silica is not classifiable as to its carcinogenicity to humans (groupe 3). However crystalline silica inhaled in the form of quartz or cristobalite is carcinogenic to humans (group 1) so the amorphous silica should be handled as if possessing the same hazards as the crystalline form.
