# NUOVA LINEA TERMOBLOCCHI

Il nuovo Thermoblock è progettato per essere largamente utilizzato in laboratori chimici, biochimici, clinici e generici per processi di stoccaggio, digestione, incubazione, concentrazione e altri processi di riscaldamento e raffreddamento e, grazie alla programmazione della temperatura in tre fasi integrata, risulta molto utile nella reazione enzimatica e in altre reazioni chimiche catalitiche.

TD: 25°C - 200°C
